[View](#) [Delete](#)

- Click the **"Documents"** button in the top-right corner of the system to navigate to the knowledge base management page

Document Upload

- Supports uploading knowledge base documents in multiple formats:
 - PDF
 - HTML
 - DOC
 - TXT

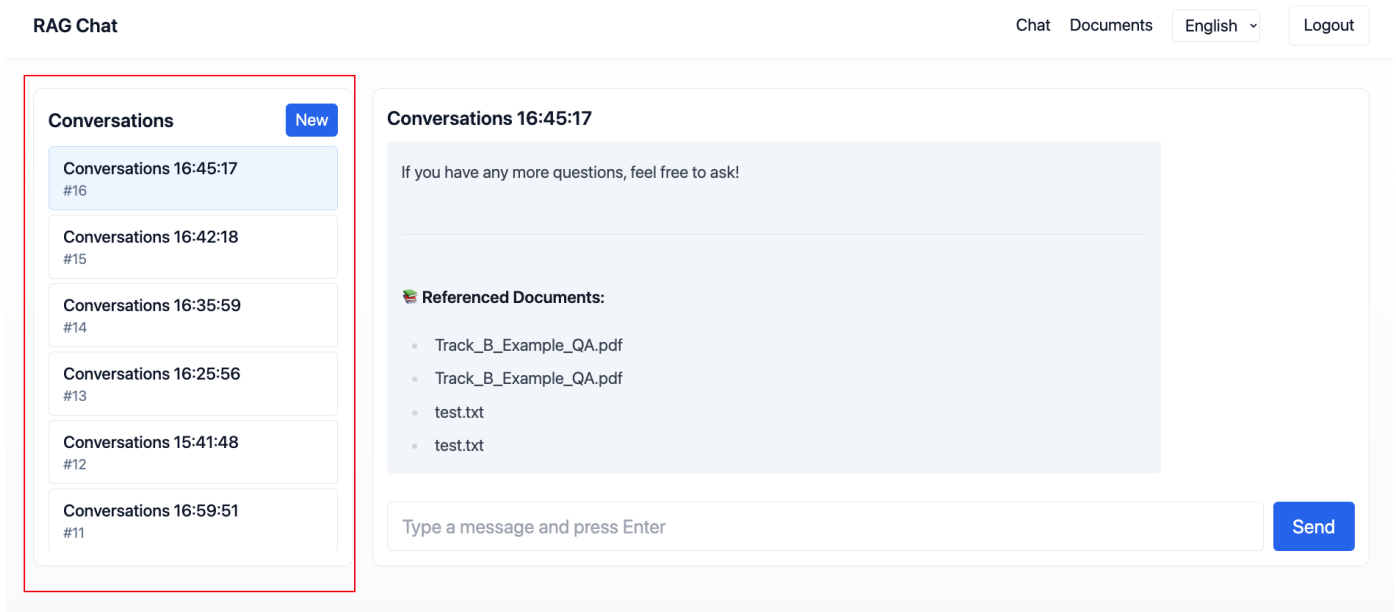

Document Browsing

- Users can browse and view document contents within the knowledge base

Chat Functionality

Accessing Chat Interface

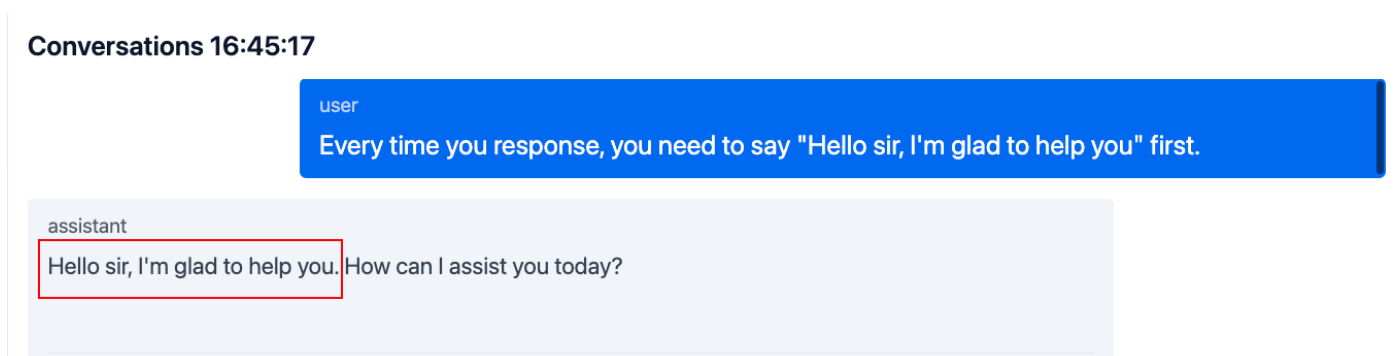

- Click the **"Chat"** button in the top-right corner of the system to switch to the chat interface

Core Chat Features

Multi-turn Conversation

- The system supports multi-turn conversations, allowing users to engage in extended dialogues

Context-Aware Conversations

- The chat system maintains context awareness throughout conversations, enabling more natural and coherent interactions

Streaming Response Generation

- Responses are generated in real-time using streaming technology for improved user experience

Reference List

Referenced Documents:

- Track_B_Example_QA.pdf
 - Track_B_Example_QA.pdf
- The system provides a reference list showing the sources used to generate responses

When things are spoiled/broken, who pays to repair?

assistant

Hello sir, I'm glad to help you. Here's who pays for repairs when things are spoiled or broken:

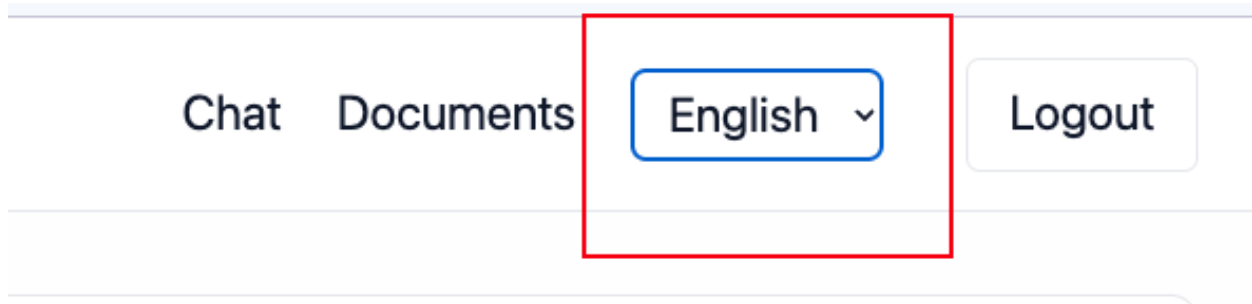

- **Minor repairs ≤ S\$200:** You (tenant) pay.
- **Repairs > S\$200:** You pay the first S\$200, and the landlord pays the rest (with landlord approval first).
- **Light bulbs/tubes:** You replace them.
- **Air-con:** The landlord pays for 3-monthly servicing and repairs (unless you caused the damage).
- **Fair wear & tear on built-ins** (wardrobe, toilet, wiring, water heater, walls, etc.): This is at the

Type a message and press Enter

- Chat responses support Markdown format rendering for better readability and formatting

User Experience

Multi-language Support

- The system supports multiple language switching, allowing users to interact in their preferred language

Summary

This system provides a comprehensive platform for knowledge management and intelligent conversation, featuring:

- **Secure user authentication** with role-based access control
- **Flexible knowledge base management** with multi-format document support
- **Advanced chat capabilities** powered by RAG (Retrieval-Augmented Generation) technology
- **Enhanced user experience** with multi-language support and intuitive interface design
